

We make it work.

ELCA

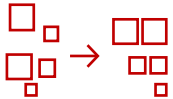

The Independent
Swiss IT Company

In a nutshell

ELCA is one of the biggest independent Swiss full-service providers for business and technology solutions.

We are leader in the fields of IT business consulting, software development, software maintenance and IT systems integration. Our solutions reduce complexity and increase innovation cycles, improve business outcomes and customer satisfaction.

Our privately owned company has branches in Lausanne (Head Office), Geneva, Basel, Berne, Zurich, Rapperswil, Madrid and Paris as well as offshore/nearshore centers in Vietnam, Mauritius, Spain and Italy, all operating according to a common process framework.

Why Choosing Palermo?

Need to create an additional Near-Shoring Center to extend our capabilities in Europe.

Italy was a natural choice thanks to its geographical and cultural proximity to Switzerland

Palermo is the 5th largest city in Italy

Very good universities in Sicily

Sizeable talent & pool locally

Opportunity to find talents willing to return to Sicily

Possibility to operate new shoring delivery models thanks to a tight integration between Switzerland and our German speaking shoring front-end in Bolzano (opening in September 2023)

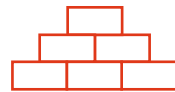

Committed

Because focusing on our client's business, working as a team and leveraging our knowledge and experience, enables us to deliver excellent solutions.

Collaborative

Because working together, shoulder-to-shoulder, brings first-class results and mutual success.

Well-founded

Because we are passionate about innovative thinking and technical perfection, we develop out-of-the-box solutions to achieve competitive advantages for ELCA and our clients.

Independent

Because our responsibility is to deliver value to our clients, regardless of the technology required.

Trustworthy

Because you can trust us to say what we'll do and to do what we say.

**Strong
Values**

We make it work.
